

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

## INSPECTORS' REPORT.

---

MICHIGAN STATE PRISON, }  
Jackson, Mich., Oct. 1, 1883. }

*To the HON. JOSIAH W. BEGOLE, Governor of Michigan:*

The Board of Inspectors of the Michigan State Prison herewith transmit to you the report of the Warden, made to the Board this day. As this report seems to embody all that is necessary under the law, the Board has nothing of special importance to add thereto.

By the provisions of act No. 206 of the laws of 1881, the Board is required by the first day of November preceding the regular session of the Legislature, to make out and present to the Governor a detailed statement of the operations of the Institution for the two fiscal years closing on the thirtieth day of the preceding September, including the report of the Warden. In view of this provision of the law, any recommendations the Board may think it for the interest of the Prison to make, will be deferred to another year.

A detailed statement of earnings and expenses will be found in the Warden's Report. When we take into consideration the increase in cost of many articles of food, and the diminution of the working force of the Prison, the fact that the expenses exceed the earnings for the year only \$2,927.72, is a subject of congratulation rather than otherwise.

It gives us pleasure to commend the general administration of the affairs of the Prison for the year. The changes in the officers, as far as changes have been made, have worked no detriment to its interests. We believe all aim to do their whole duty, and that whenever there is an opportunity for improvement in prison management, such opportunity will not be neglected.

A. A. BLISS,  
W. A. WOODARD, JR.,  
ALBERT L. DREW,  
*Inspectors Michigan State Prison.*

## WARDEN'S REPORT.

WARDEN'S OFFICE,  
MICHIGAN STATE PRISON,  
Jackson, October 1, 1883. }

*To the Board of Inspectors:*

GENTLEMEN,—In compliance with the provisions of Sec. 24 of "An act to revise and consolidate the laws relative to the State Prison and the government and discipline thereof," the Warden submits his report of the transactions of the prison for the fiscal year ending September 30, 1883.

This not being the year in which a full inventory or sworn appraisal of real estate and personal property of the prison is required by law to be made (see Sec. 3, Act No. 206, S. L. of 1881), the valuation of the real estate as given below is procured by using the valuation of 1882, and adding thereto the cost of permanent improvements and new buildings. The value of the personal property is obtained from the department returns, which show monthly the losses and gains, and is correct if the appraisal of last year was correct.

Expenses of the year in excess of the earnings of the year.. \$2,927 72

The expenditures of the year have been materially increased by the absolute necessity of making extensive repairs and improvements, for which an appropriation ought to have been asked of the last Legislature, and which could not well be postponed until after another session. Reference is made to the changes in the business offices in the interest of convenience and health, including the substitution of new floors in place of the decayed and rotten ones, with excavation and ventilation beneath; to the thorough renovation of the chapel, the walls of which were blackened with age, smoke, and coal dust, and the ceiling broken and falling; to like improvements in the prayer meeting room; to the concrete walks laid in the grounds and along Cooper street; to the artesian well and the additional supply of water; to the smoke consumers attached to the boilers, with a view to the saving of fuel and also to the abatement of a nuisance; and to the sewing machine placed in the broom shop, with an aim to increased production and better work. These improvements have been paid for in part from an old appropriation balance, and in part from the current expense account.
